

LAB EXPERIMENT-1

Flight Reservation System using Zoho Creator (SaaS)

Aim:

To create a simple cloud-based Flight Reservation System using Zoho Creator to demonstrate the Software as a Service (SaaS) model with fields such as One Way, Round Trip, From, To, Departure Date, Return Date, Travelers & Class, Fare Type, and Flight Type (Domestic/International).

Software/Tools Required:

- Zoho Creator (Cloud SaaS Platform)
- Web Browser
- Internet Connection

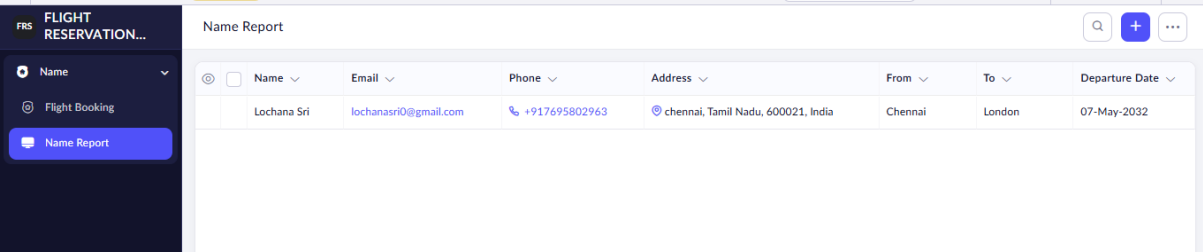

Algorithm:

1. Start.
2. Log in to Zoho Creator.
3. Create a New Application.
4. Name the application Flight Reservation System.
5. Create a new Form named Flight Reservation.
6. Add all required fields.
7. Set the appropriate field types (Text, Choice, Date, Dropdown, etc.).
8. Save the form.
9. Publish or run the application.
10. Enter flight reservation details.
11. Click Submit.
12. Store the reservation details in Zoho Creator Cloud Database.
13. Display the submitted record.
14. Stop.

Form Fields:

Field Name	Field Type
Passenger Name	Single Line
Email Address	Email
Mobile Number	Phone Number
Flight Type	Radio Button (One Way, Round Trip)
From	Dropdown
To	Dropdown
Departure Date	Date
Return Date	Date
Travelers	Number
Travel Class	Dropdown (Economy, Premium Economy, Business, First Class)
Fare Type	Dropdown (Regular, Student, Senior Citizen)
Flight Category	Radio Button (Domestic, International)
Special Request	Multi-Line

OUTPUT SCREENSHOTS:

Result:

Thus, a cloud-based Flight Reservation System was successfully created using Zoho Creator. The application demonstrates the Software as a Service (SaaS) model by collecting and storing reservation details securely in the cloud.

Experiment No.:2

Property Buying & Rental System (Chennai City) using Zoho Creator (SaaS)

Aim:

To create a simple cloud-based Property Buying & Rental System for Chennai city using Zoho Creator to demonstrate the Software as a Service (SaaS) model with fields such as Buy, Rent, Commercial, Rental Agreement, Area, Place, Budget Range, Property Value, and other necessary details.

Software/Tools Required:

- Zoho Creator (Cloud SaaS Platform)
- Web Browser
- Internet Connection

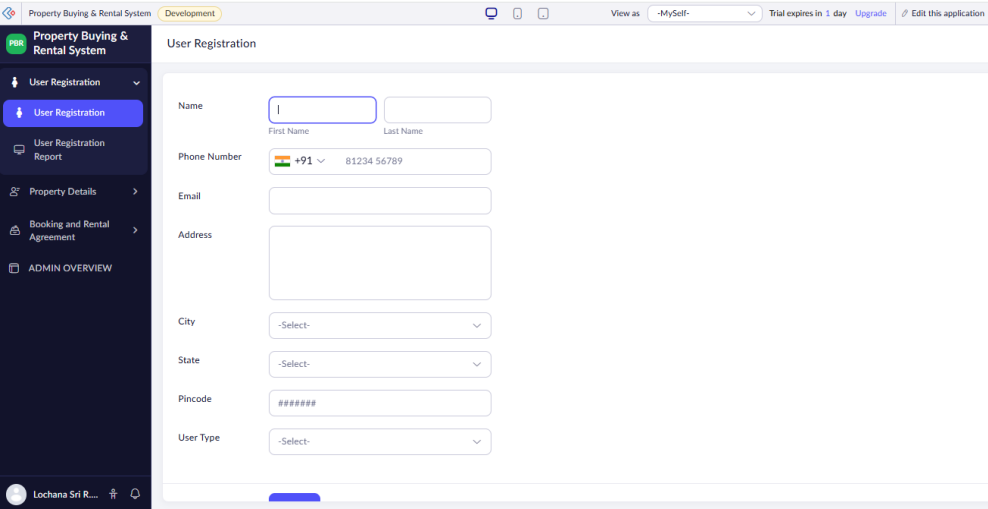

Algorithm

1. Start.
2. Log in to Zoho Creator.
3. Create a New Application.
4. Name the application Property Buying & Rental System.
5. Create a new Property Registration Form.
6. Add all required fields.
7. Assign suitable field types (Text, Dropdown, Date, Currency, etc.).
8. Save the form.
9. Run the application.
10. Enter customer and property details.
11. Click Submit.
12. Store the information in the Zoho Creator cloud database.
13. Display the submitted record.
14. Stop.

Form Fields:

Field Name	Zoho Creator Field Type
Customer Name	Single Line
Email Address	Email
Mobile Number	Phone
Property Type	Radio (Buy, Rent)
Property Category	Dropdown (Residential, Commercial)
Rental Agreement	Radio (Yes, No)
Area (sq.ft)	Number
Place (Chennai Locations)	Dropdown
Budget Range	Dropdown
Property Value	Currency
Number of Bedrooms	Number
Address	Multi Line
Preferred Possession Date	Date
Additional Requirements	Multi Line

Result:

Thus, a cloud-based Property Buying & Rental System was successfully created using Zoho Creator. The application demonstrates the Software as a Service (SaaS) model by allowing users to submit and store property buying and rental details securely in the cloud.

Experiment No.:3

Car Booking Reservation System using Zoho Creator (SaaS)

Aim:

To create a simple cloud-based Car Booking Reservation System using Zoho Creator to demonstrate the Software as a Service (SaaS) model with fields such as Search for Cabs, From, To, Rental, Outstation, Package Type, Hours/Days, and other booking details.

Software/Tools Required:

- Zoho Creator (Cloud SaaS Platform)
- Web Browser
- Internet Connection

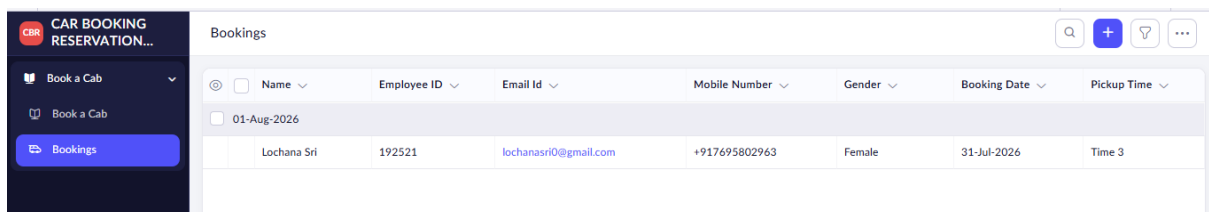

Algorithm:

1. Start.
2. Log in to Zoho Creator.
3. Create a New Application.
4. Name the application Car Booking Reservation System.
5. Create a new Car Booking Form.
6. Add all the required fields.
7. Assign suitable field types (Text, Dropdown, Date, Number, etc.).
8. Save the form.
9. Run the application.
10. Enter the booking details.
11. Click Submit.
12. Store the booking information in the Zoho Creator cloud database.
13. Display the submitted booking record.
14. Stop.

Form Fields:

Field Name	Zoho Creator Field Type
Customer Name	Single Line
Email Address	Email
Mobile Number	Phone
Search for Cabs	Dropdown
Trip Type	Radio (Rental, Outstation)
From	Single Line
To	Single Line
Pickup Date	Date
Pickup Time	Time
Package Type	Dropdown
Hours/Days	Number
Number of Passengers	Number
Payment Method	Dropdown
Special Instructions	Multi Line

OUTPUT SCREENSHOTS:

The screenshot displays the 'CAR BOOKING RESERVATION...' application interface. On the left is a dark sidebar with a menu containing 'Book a Cab' (twice) and 'Bookings' (highlighted in blue). The main area is titled 'Bookings' and features a table with columns: Name, Employee ID, Email Id, Mobile Number, Gender, Booking Date, and Pickup Time. A filter '01-Aug-2026' is applied to the Booking Date column. The table contains one entry for 'Lochana Sri' with Employee ID '192521', Email 'lochanasri0@gmail.com', Mobile Number '+917695802963', Gender 'Female', Booking Date '31-Jul-2026', and Pickup Time 'Time 3'.

Experiment No.:4

Library Book Reservation System for SIMATS Library using Zoho Creator (SaaS)

Aim:

To create a simple cloud-based Library Book Reservation System for SIMATS Library using Zoho Creator to demonstrate the Software as a Service (SaaS) model with fields such as Book Title, Author, Publication, Year, Edition, Number of Copies, Rack Number, and Book Status (Taken/Returned).

Software/Tools Required:

- Zoho Creator (Cloud SaaS Platform)
- Web Browser
- Internet Connection

Algorithm:

1. Start.
2. Log in to Zoho Creator.
3. Create a New Application.
4. Name the application SIMATS Library Book Reservation System.
5. Create a new Library Book Reservation Form.
6. Add all the required fields.
7. Assign suitable field types (Text, Number, Date, Dropdown, etc.).
8. Save the form.
9. Run the application.
10. Enter the library book details.
11. Click Submit.
12. Store the reservation details in the Zoho Creator cloud database
13. Display the submitted record.
14. Stop.

Form Fields:

Field Name	Zoho Creator Field Type
Student Name	Single Line
Registration Number	Single Line
Department	Dropdown
Email Address	Email
Mobile Number	Phone
Book Title	Single Line
Author	Single Line
Publication	Single Line
Publication Year	Number
Edition	Single Line
Number of Copies	Number
Rack Number	Single Line
Book Status	Radio (Taken, Returned)
Reservation Date	Date
Return Date	Date
Remarks	Multi Line

OUTPUT SCREENSHOTS:

The first screenshot displays the 'Student Registration' form. It features a sidebar with navigation options: 'Student Registration' (selected), 'Student Registration Report', 'Book Details', and 'Book Reservation'. The main form includes fields for Student Name, Register Number, Department (dropdown), Year (dropdown), Phone (with a country code dropdown set to +91 and a value of 81234 56789), and Email. A 'Submit' button is at the bottom.

The second screenshot shows the 'Book Details Report' table. The sidebar has 'Book Details Report' selected. The table has columns: Book Id, Book Title, Author, Publication, Year, No. of Copies, and Rack Number. The data row shows: 1, ShatterMe, Tahereh Mafi, Electric Metric, 2011, 40000, 4.

The third screenshot shows the 'Student Registration Report' table. The sidebar has 'Student Registration Report' selected. The table has columns: Student Id, Student Name, Register Number, Department, Year, Phone, and Email. The data rows are:

Student Id	Student Name	Register Number	Department	Year	Phone	Email
2	AbinayaSri	192524429	AIDS	II	+91987529776	abinaya565@gmail.com
1	Lochana	192521348	Informational Technology	II	+918124356789	lochanasri0@gmail.com

Result:

Thus, a cloud-based Library Book Reservation System for SIMATS Library was successfully created using Zoho Creator. The application demonstrates the Software as a Service (SaaS) mode.

Experiment No.:5

Mark Sheet Processing System using Zoho Creator (SaaS)

Aim:

To create a simple cloud-based Mark Sheet Processing System using Zoho Creator to demonstrate the Software as a Service (SaaS) model with fields such as Student Name, Registration Number, Subjects, Marks, Average, Percentage, Rank, and Overall Performance.

Software/Tools Required:

- Zoho Creator (Cloud SaaS Platform)
- Web Browser
- Internet Connection

Algorithm:

1. Start.
2. Log in to Zoho Creator.
3. Create a New Application.
4. Name the application Mark Sheet Processing System.
5. Create a new Student Mark Sheet Form.
6. Add all the required fields.
7. Enter the student's details and subject marks.
8. Calculate the Total Marks.
9. Calculate the Average Marks.
10. Calculate the Percentage.
11. Assign the Rank.
12. Determine the Overall Performance based on the percentage.
13. Save and submit the form.
14. Store the details in the Zoho Creator cloud database.
15. Display the processed mark sheet.
16. Stop.

Form Fields:

Field Name	Zoho Creator Field Type
Student Name	Single Line
Register Number	Single Line
Department	Dropdown
Semester	Dropdown
Subject 1	Single Line
Marks 1	Number
Subject 2	Single Line
Marks 2	Number
Subject 3	Single Line
Marks 3	Number
Subject 4	Single Line
Marks 4	Number
Subject 5	Single Line
Marks 5	Number
Total Marks	Formula/Number
Average	Formula/Decimal
Percentage	Formula/Decimal
Rank	Number
Overall Performance	Dropdown/Formula
Remarks	Multi Line

OUTPUT SCREENSHOTS:

The first screenshot displays the 'Student Registration' form. The left sidebar contains a menu with 'MARK SHEET PROCESSING...' at the top, followed by 'Student Registration' (selected), 'Student Registration Report', and 'Marks Entry'. The main content area is titled 'Student Registration' and contains the following fields:

- Student Name: Two input fields for First Name and Last Name.
- Register Number: A single-line input field with a placeholder '#####'.
- Department: A dropdown menu with '-Select-'.
- Year: A dropdown menu with '-Select-'.
- Email: A single-line input field.
- Phone Number: A field with a country code dropdown (set to +91) and a number input field containing '81234 56789'.

A 'Submit' button is located at the bottom of the form.

The second screenshot displays the 'Student Registration Report' table. The left sidebar is identical to the first screenshot. The main content area is titled 'Student Registration Report' and contains a table with the following data:

	Student Name	Register Number	Department	Year	Email	Phone Number	Student Id
☐	Lochana Sri	192521348	AIML	IV	lochanasri0@gmail.com	+917695802963	1

Result:

Thus, a cloud-based Mark Sheet Processing System was successfully created using Zoho Creator. The application demonstrates the Software as a Service (SaaS) model by storing student records, calculating marks, averages, percentages, ranks, and displaying the overall performance securely in the cloud.

Experiment No.:6

Payroll Processing System using Zoho Creator (SaaS)

Aim:

To create a simple cloud-based Payroll Processing System using Zoho Creator to demonstrate the Software as a Service (SaaS) model with fields such as Employee Name, Experience in Present Organization, Overall Experience, Basic Pay, HRA, DA, TA, Gross Pay, and Net Pay.

Software/Tools Required:

- Zoho Creator (Cloud SaaS Platform)
- Web Browser
- Internet Connection

Algorithm:

1. Start.
2. Log in to Zoho Creator.
3. Create a New Application.
4. Name the application Payroll Processing System.
5. Create a new Employee Payroll Form.
6. Add all the required fields.
7. Enter the employee details and salary components.
8. Calculate Gross Pay by adding Basic Pay, HRA, DA, and TA.
9. Calculate Net Pay after applicable deductions (if any).
10. Save and submit the form.
11. Store the payroll details in the Zoho Creator cloud database.
12. Display the employee payroll record.
13. Stop.

Form Fields:

Field Name	Zoho Creator Field Type
Employee ID	Single Line
Employee Name	Single Line
Department	Dropdown
Designation	Single Line
Experience in Present Organization (Years)	Number
Overall Experience (Years)	Number
Basic Pay	Currency
HRA	Currency
DA	Currency

Result:

Thus, a cloud-based Payroll Processing System was successfully created using Zoho Creator. The application demonstrates the Software as a Service (SaaS) model by calculating employee salaries, gross pay, net pay, and securely storing payroll records in the cloud.

Experiment No.: 7

Students Attendance System using Zoho Creator (SaaS)

Aim:

To create a simple cloud-based Students Attendance System using Zoho Creator to demonstrate the Software as a Service (SaaS) model with fields such as Student Name, Course, Present, Absent, Course Attendance, OD Request, Grade, and Attendance Percentage.

Software/Tools Required:

- Zoho Creator (Cloud SaaS Platform)
- Web Browser
- Internet Connection

Algorithm:

1. Start.
2. Log in to Zoho Creator.
3. Create a New Application.
4. Name the application Students Attendance System.
5. Create a new Student Attendance Form.
6. Add all the required student and attendance-related fields.
7. Enter the student details, course information, and attendance records.
8. Calculate the attendance percentage based on the total classes attended.
9. Record the OD (On Duty) request status and assign the attendance grade.
10. Save and submit the attendance details.
11. Store the attendance records securely in the Zoho Creator cloud database.
12. Generate and display the attendance report.
13. View the attendance dashboard showing student attendance statistics.
14. Stop.

Online Super Market using Zoho Creator (SaaS)

Aim:

To create a simple cloud-based Online Super Market application using Zoho Creator to demonstrate the Software as a Service (SaaS) model with fields such as Customer Name, Address, Phone, Email, Items, Quantity, and Item Classification.

Software/Tools Required:

- Zoho Creator (Cloud SaaS Platform)
- Web Browser
- Internet Connection

Algorithm:

1. Start.
2. Log in to Zoho Creator.
3. Create a New Application.
4. Name the application Online Super Market.
5. Create a new Customer Order Form.
6. Add all the required customer and product-related fields.
7. Enter the customer details and select the required items.
8. Specify the item classification and quantity.
9. Calculate the total amount based on the quantity and unit price.
10. Save and submit the order details.
11. Store the customer order information securely in the Zoho Creator cloud database.
12. Generate and display the customer order report.
13. View the dashboard showing order details and sales summary.
14. Stop.

Form Fields:

Result:

Thus, a cloud-based Online Super Market application was successfully created using Zoho Creator. The application demonstrates the Software as a Service (SaaS) model by managing customer information, product orders, item classification, order amount calculation, and securely storing all order records in the cloud.
